### COURSE INFORMATION

Join us for a 8 sessions integration of the vestibular and visual systems, applied into clinical practice. This unique and recently revised workshop will provide a deeper understanding of the **neurobiological interaction of these sensory systems** and their collective and intertwined impact upon **movement, learning and self-regulation. Clinical reasoning, rationales for individual treatments** and a range of practical interventions will be highlighted. Included in this interactive learning experience will be discussions on **neurobiology, sensory processing intervention, relational interventions, Neuro-Developmental Treatment and the applications of technology.**

Participants will be able to:

- ✓ *The learner will develop an appreciation of the role of the **vestibular system** upon the postural system, learning, cognition and regulation.*
- ✓ *The learner will develop an appreciation of how **the vestibular and visual systems are integrated neurologically and functionally.***
- ✓ *The learner will develop an understanding of the **connection between vision, posture, regulation and learning.***
- ✓ *The learner will develop **clinical reasoning skills** on how **to choose** appropriate **treatment interventions** for their clients.*
- ✓ *The learner will develop an **understanding of the science and application of various vestibular and visual interventions.***
- ✓ *The learner will develop **practical skills** for intervention in a wide variety of contexts for clients across the lifespan.*

## TARGET PARTICIPANTS

This course is designed for pediatric therapists treating a wide variety of children and youth with developmental disabilities and neurological challenges. It is recommended that participants come with a basic knowledge of the vestibular and visual systems.

## AGENDA

### Part 1

The impact of the vestibular system on the postural system, regulatory system and learning

#### Session #1a

Topic: Theoretical applications for practice

Date: 13th October, 2020

#### Session #1b

Topic: Clinical assessment

Date: 17th October, 2020

### Part 2

The impact of the visual system and its impact on the postural system, regulatory system and learning

#### Session #2a

Topic: Theoretical applications for practice

Date: 20th October, 2020

#### Session #2b

Topic: Clinical assessment

Date: 24th October, 2020

### Part 3

The science and application of interventions

#### Session #3a

Topic: Clinical reasoning and application of visual interventions: colour therapy lenses, Irlen lenses, oral motor supports, visual perceptual applications. Intervention labs and video analysis

Date: 27th October, 2020

#### Session #3b

Topic: The science of eye tracker and its application to social connection, learning and posture

Date: 31st October, 2020

#### Session #3c

Topic: Clinical reasoning and application of vestibular interventions to enhance posture, regulation and learning. Intervention labs and video analysis

Date: 3rd Nov, 2020

#### Session #3d

Topic: Contextual applications, home, school and community

Date: 7th Nov, 2020
