

## BECKMAN ORAL MOTOR ASSESSMENT AND INTERVENTION<sup>®</sup> COURSE

3<sup>RD</sup> & 7<sup>TH</sup> DECEMBER, 2020 (THU & MON)

(VIRTUAL ONLINE VERSION)

by

**Mr. Stephen Chan**

Beckman Oral Motor Protocol Instructor, MSc, BSc (OT)

### **About the Workshop**

Oral motor impairment presents a variety of challenges for both the individual affected, and for the care team providing intervention. Often the individual experiencing oral motor difficulties is not able to follow commands. The person may not be eating or taking fluids orally, which reduces the opportunities for observation of oral movement patterns. The majority of baseline protocols currently available require at least minimal direction-following skills. **The protocol developed by Beckman uses mechanical muscle responses, which are not mediated cognitively, to baseline the response to pressure and movement, including range of movement, variety of movement, strength of movement and control of movement for the lips, cheeks, jaw and tongue.**

In this two-day course, participants will actively participate in **hands-on practice** for compensatory handling techniques for the following concerns: **tonic bite, tonic bite on an utensil, slow oral transit, tongue thrust, cough, gag and vomit.** The **participants will complete an oral motor protocol with each other, analyze the results, and discuss data tracking.** Participants will also complete **hands-on practice for specific oral motor interventions to address deficit areas discovered** during baseline assessment.

### **About the Speaker**

**Mr. Stephen Chan** is an Occupational Therapist whose experience in learning the Beckman Oral Motor Protocol started by staying two weeks at Debra Beckman's Clinic at Florida, US in 2005. In the same year, he learnt the protocol formally from the 2-days Beckman Oral Motor Assessment and Intervention Course in San Jose of US. After that, Stephen completed his Master dissertation with Beckman Oral Motor Protocol on treating drooling in students with severe intellectual disability. Stephen Chan also completed a project funded by Quality Education Fund (project no.: 2004/0140) on educating parents for oral motor intervention with multimedia.

Mr. Stephen Chan had worked in a special school and applied the Beckman Oral Motor Protocol to children with severe intellectual disability and cerebral palsy. He is also experienced in using this protocol in clinic for people with feeding problems and developmental disabilities (e.g. autism, developmental delay, etc.).

### Preparation For The Course

1. Participants will join the live meeting through Zoom for the Beckman Oral Motor Course. Access to the camera will be required at all times during the course for attendance record and for the instructor to observe your practice.
2. For hands-on practice, it is preferred that you have a practice partner. If the COVID-19 is still widely spread by the time the course is held, it is recommended that you have a partner who you are currently living with. Children are okay too!
3. Following the course, each participant will email the course evaluation to CREST at [crest.hongkong@gmail.com](mailto:crest.hongkong@gmail.com). A PDF certificate will be sent through email following the receipt of the course evaluation.
4. The course materials and intellectual property is copyrighted in all formats and the live online session cannot be recorded.
5. CREST hopes to provide an extra session of in-person practice at our centre physically in December to facilitate better learning after participants have completed the course. The exact time and date will be announced later and we'll try our best to accommodate participants' schedule.

### Feedbacks from Previous Course Participants

(Feel satisfied with) practicum. Instructor provided valuable feedback.

ST (Aug, 2020 Class) (Virtual Presentation)

The course was well-organised. The course materials were comprehensive and informative (both printed materials and videos). Course instructor delivered information and explained clearly.

OT (Aug, 2020 Class) (Virtual Presentation)

Techniques were clearly demonstrated and explained. Also enjoyed how speaker played videos of his own children to show us some of the techniques.

ST (Aug, 2020 Class) (Virtual Presentation)

Demonstrations from different angle were great. It helps participants to understand the techniques in an easier way, even (when) using Zoom for lesson.

OT (Aug, 2020 Class) (Virtual Presentation)

I feel satisfied with demonstration of techniques. Very well-prepared Zoom training with good use of different cameras, (participants) can see the demonstration clearly.

OT (Aug, 2020 Class) (Virtual Presentation)

The speaker is very knowledgeable and would share some basic OT concepts, which is useful for a ST. Overall a great course. The speaker was enthusiastic about teaching. Interesting content was added (e.g. speaker's personal experiences).

ST (Aug, 2020 Class) (Virtual Presentation)
