The Certificate in Ayres Sensory Integration® (CASI), is issued by **CLASI, an Approved Provider of continuing education by the American Occupational Therapy Association (AOTA)**. The ASI Certificate ensures that its learners have completed a minimum of a **total of 120 contacts hours** and participated in designated activities aimed at acquisition of knowledge and skills in sensory integration, in accordance with the international requirements (i.e. **ICEASI standard**), as follows:

- The theoretical foundations of sensory integration based on the original work of Dr. A. Jean Ayres
- Updated basic and applied science related to sensory integration theory
- The contributions of sensory integration to typical development
- Administration of relevant evaluations of core sensory integrative functions (e.g. the Evaluation in Ayres Sensory Integration® (EASI), the Sensory Integration and Praxis Tests (SIPT); the Sensory Processing Measure (SPM™), Ayres' clinical observations, etc.)
- Clinical reasoning guiding the use of sensory integration in clinical practice
- Interpretation of the results of the evaluation data based on research on the patterns of sensory integration function and dysfunction
- Goal preparation and intervention planning
- The implementation of professional therapeutic intervention, with a focus on sensory integration strategies in different contexts
- Leadership and mentorship of theory, practice and research in ASI
- Reviews of existing research, and ways in which to plan and implement research related to ASI
- Avenues for advocacy in promoting evidence-based practice in ASI for consumers

Module 1: Ayres Sensory Integration® (ASI) Theory

Course Description:

The latest advancements in neuroscience support the application of the theory of sensory integration as an approach to dealing with children, adolescents, adults and older adults. This module will provide the therapists a theoretical basis for the application of the theory of sensory integration for the clinical practice.

The trainings for the first module will provide a study to the theory of sensory integration, the central nervous system, the neuroscience of sensory systems, modulation, the praxis and the principles of the evaluation and intervention in sensory integration.

Learning Objectives:

Following this course, participants will be able to...

- Identify the interpretive models of the theory of sensory integration
- Describe the neurological structures and their functions involved in the process of sensory integration
- Describe functional implications and occupational factors on the basis of the changes of sensory impairments
- Discuss the praxis and its role in performance and behavior
- Evaluate the quality of research related to sensory integration

Format:

Module 1: *Online (24 – 30 Hours)*

Starts in Nov, 2023 (*accessible for 1 year*)

**To be completed by 4th Jan, 2024 if to join Module 3 which starts on 4th Jan, 2024*

Course Description:

Modules 2 and 3 are designed to teach evaluations of Ayres Sensory Integration® function and dysfunction that include: Evaluation in Ayres Sensory Integration® (EASI), The Sensory Integration and Praxis Tests (SIPT), Sensory Processing Measure (SPM™), structured and unstructured clinical observations.

Learning Objectives:

It is intended that at the end of the trainings for Modules 2 and 3, participants will be able to:

- Determine an assessment plan for a client
- Determine the evaluations appropriate to assess ASI constructs in all areas
- Analyze the psychometric strength of the evaluations
- Reliably administer the EASI
- Understand the constructs tested by the EASI, SIPT, SPM™ and related measures
- Demonstrate competence in the application of clinical observations based on ASI
